

Listing Back Office panel

December 2021

Listing

Access point, for admin and provider users, to keep track of content ingestion and validation, with possibility to perform and certain actions on single and multiple selected content.

Admin view actions

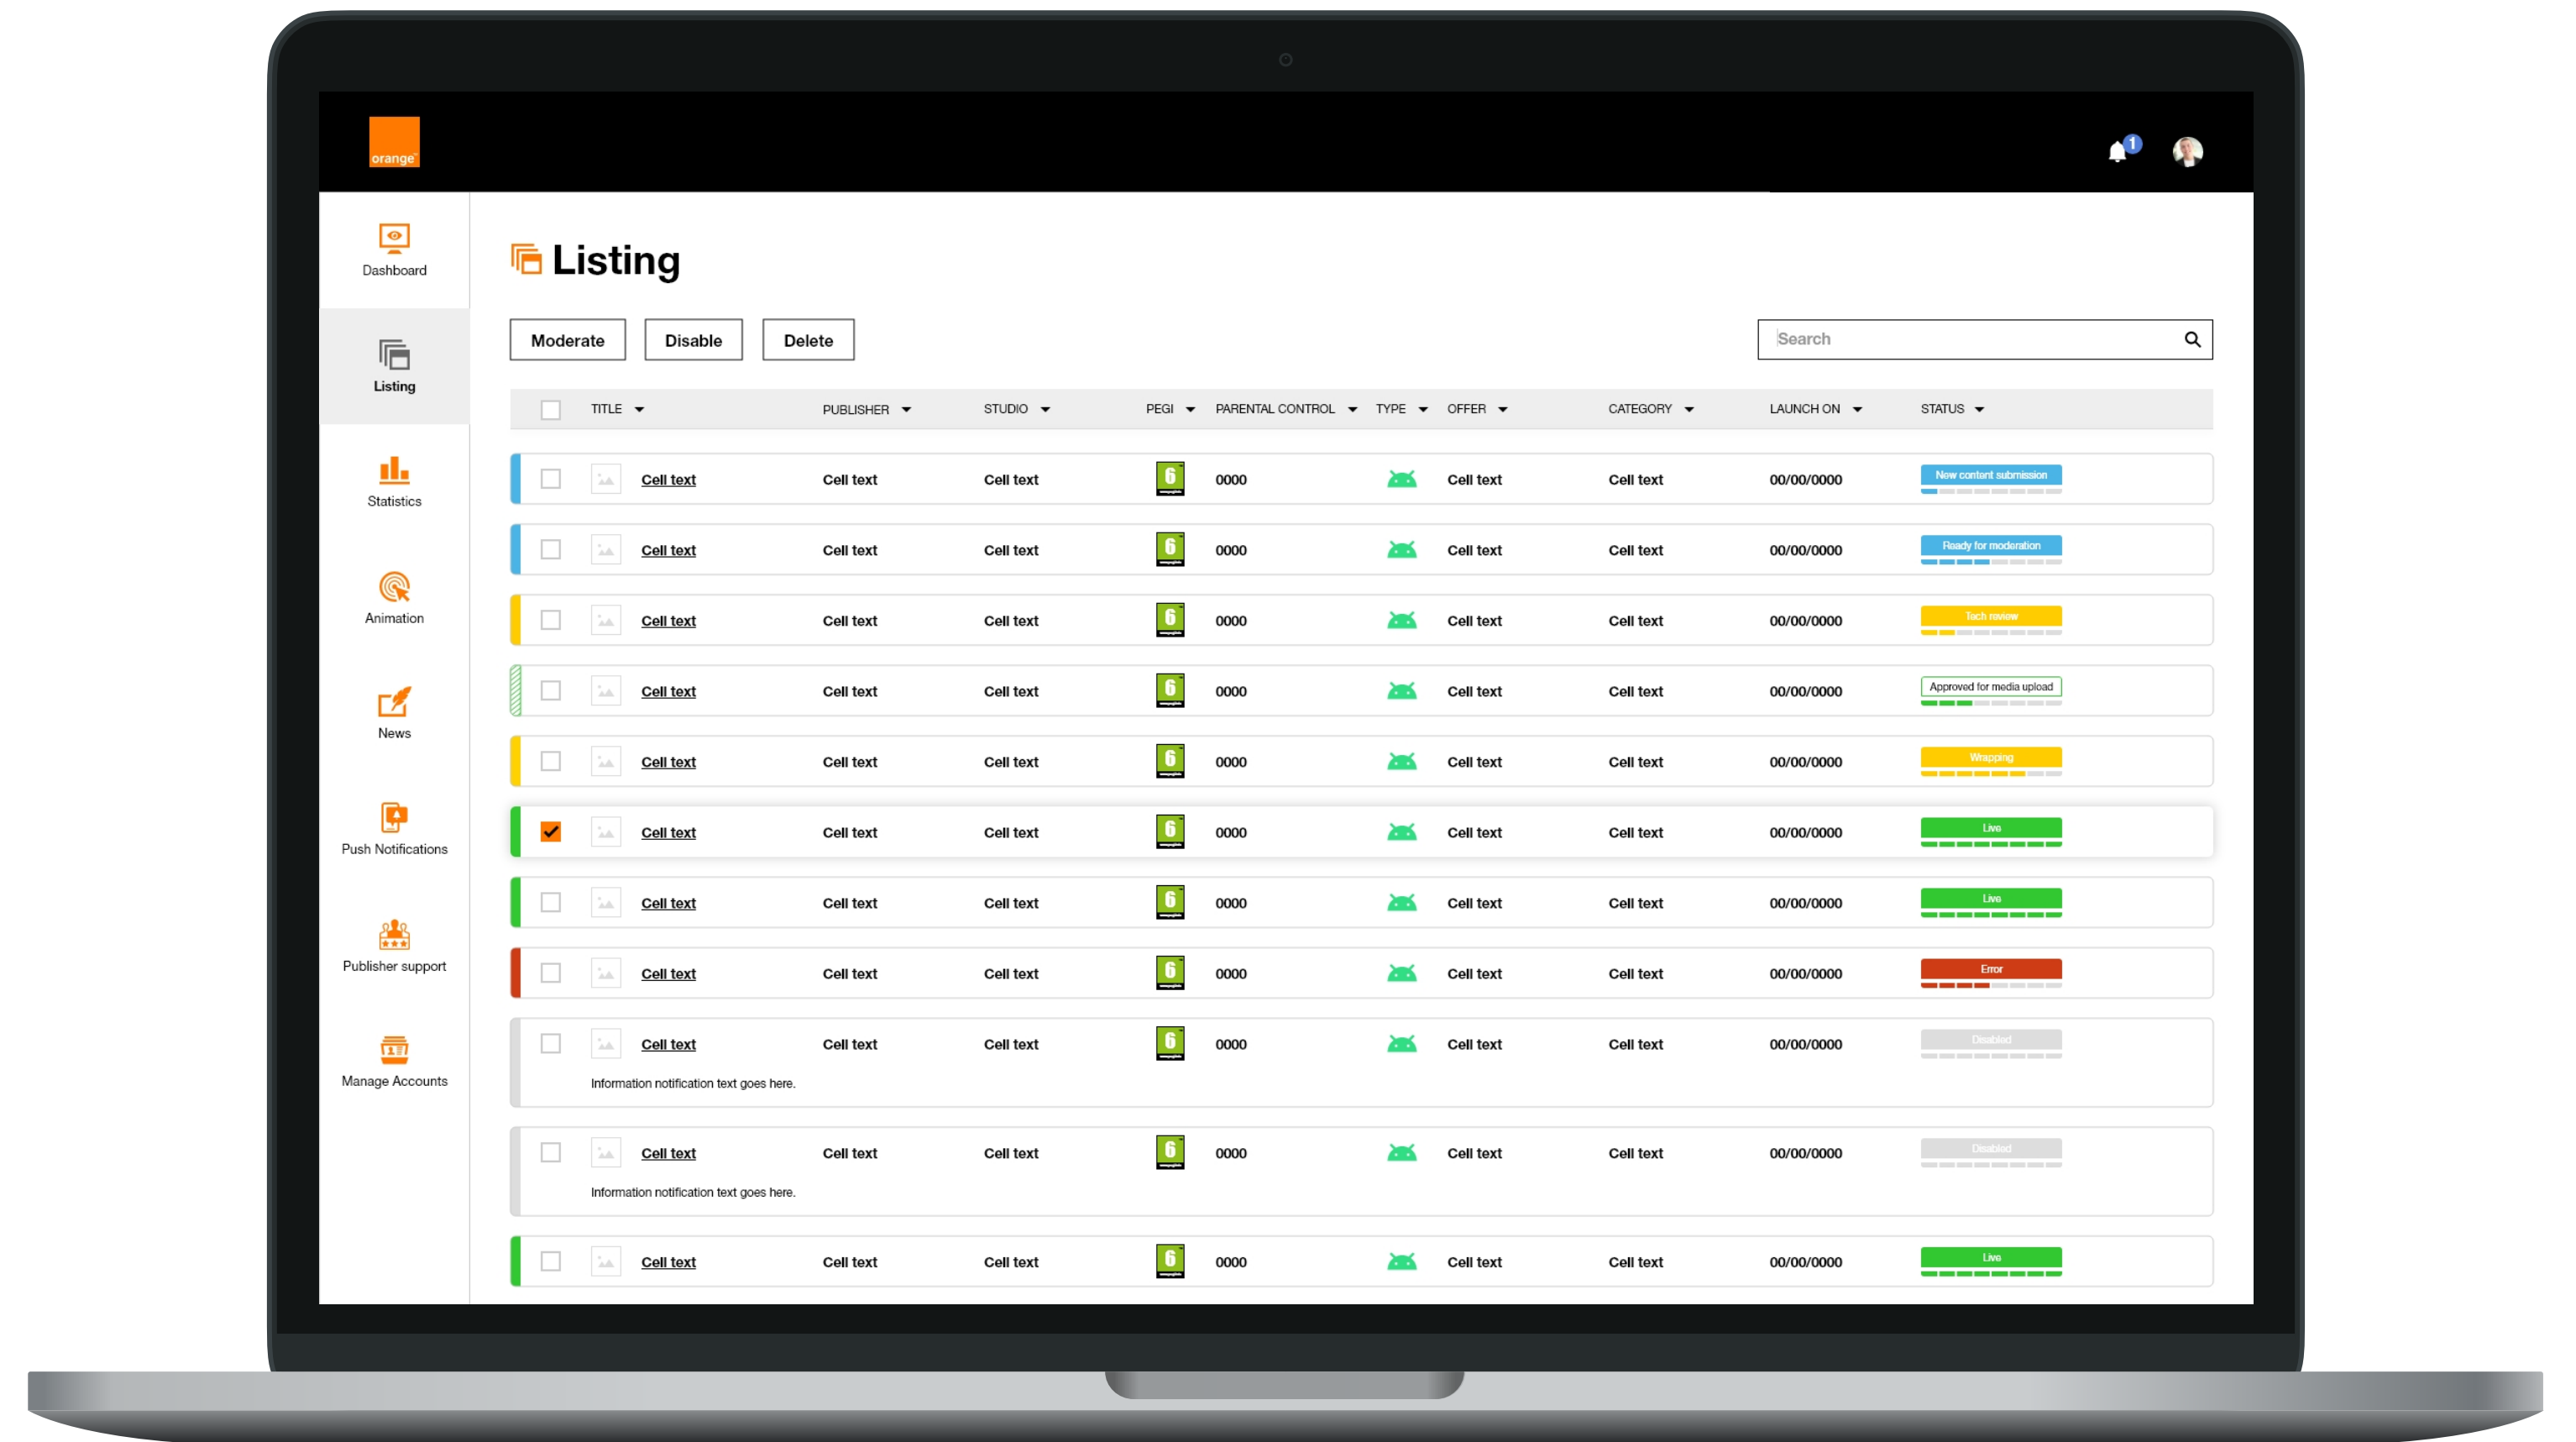

Admin users will be able to search, moderate, disable/activate and delete content.

Provider view actions

Providers will be able to search, add a comment and ask for content removal, which will need to be validated by Orange.

States

Ingested content are labelled with states, which update according to progress. States, also, indicate when user actions are required.

Specifications and anatomy

Parameters per view

Parameters are a legenda of the information to be displayed in each row inside the listing screen

Admin view

<input type="checkbox"/>	TITLE ▼	PUBLISHER ▼	STUDIO ▼	PEGI ▼	PARENTAL CONTROL ▼	TYPE ▼	OFFER ▼	CATEGORY ▼	LAUNCH ON ▼	STATUS ▼
--------------------------	---------	-------------	----------	--------	--------------------	--------	---------	------------	-------------	----------

Provider view

<input type="checkbox"/>	TITLE ▼	STUDIO ▼	PEGI ▼	PARENTAL CONTROL ▼	TYPE ▼	OFFER ▼	CATEGORY ▼	LAUNCH ON ▼	STATUS ▼
--------------------------	---------	----------	--------	--------------------	--------	---------	------------	-------------	----------

Parameters		Admin	Provider
<input type="checkbox"/> Check boxes	To select single and multiple content	✓	✓
Title	Content title	✓	✓
Publisher	Publisher is the provider	✓	✓
Studio	Providers may hold content from different brands, hence "studio" displays the brand of content being ingested	✓	✗
PEGI	Pan European Game information. Rating system established to help customers in making informed decision on content to buy.	✓	✓
Parental control	Additional moderation set in place by Orange to ensure age rating is bullet proof.	✓	✓
Type	Type of content being ingested: Android app or game, HTML5 game or iOS app.	✓	✓
Offer	Indicates the type of service inside OragePlay, (I.e. Kidjo, CN)	✓	✓
Category	Category the content is assigned. Content could be assigned to a number of categories. It would be best to remove this type of information and making it visible in the content detail when opened.	✓	✓
Launch on	Admins set a date for the launch of the cnt ingested. It'll most likely be set at content management/animation level.	✓	✓
Status	Indicates the progress of content being ingested. As progress advances, status updates.	✓	✓

Ingestion statuses explained

Content submissions by providers are divided in 2 steps:

1. file upload - which undergo a tech and editorial review by the system and Admin user.
2. media upload which will be available for the provider once the file has been moderated by Admin.
During this second phase the content will undergo an additional editorial moderation by the Admin user and tech actions to prepare and test the content prior to publication.

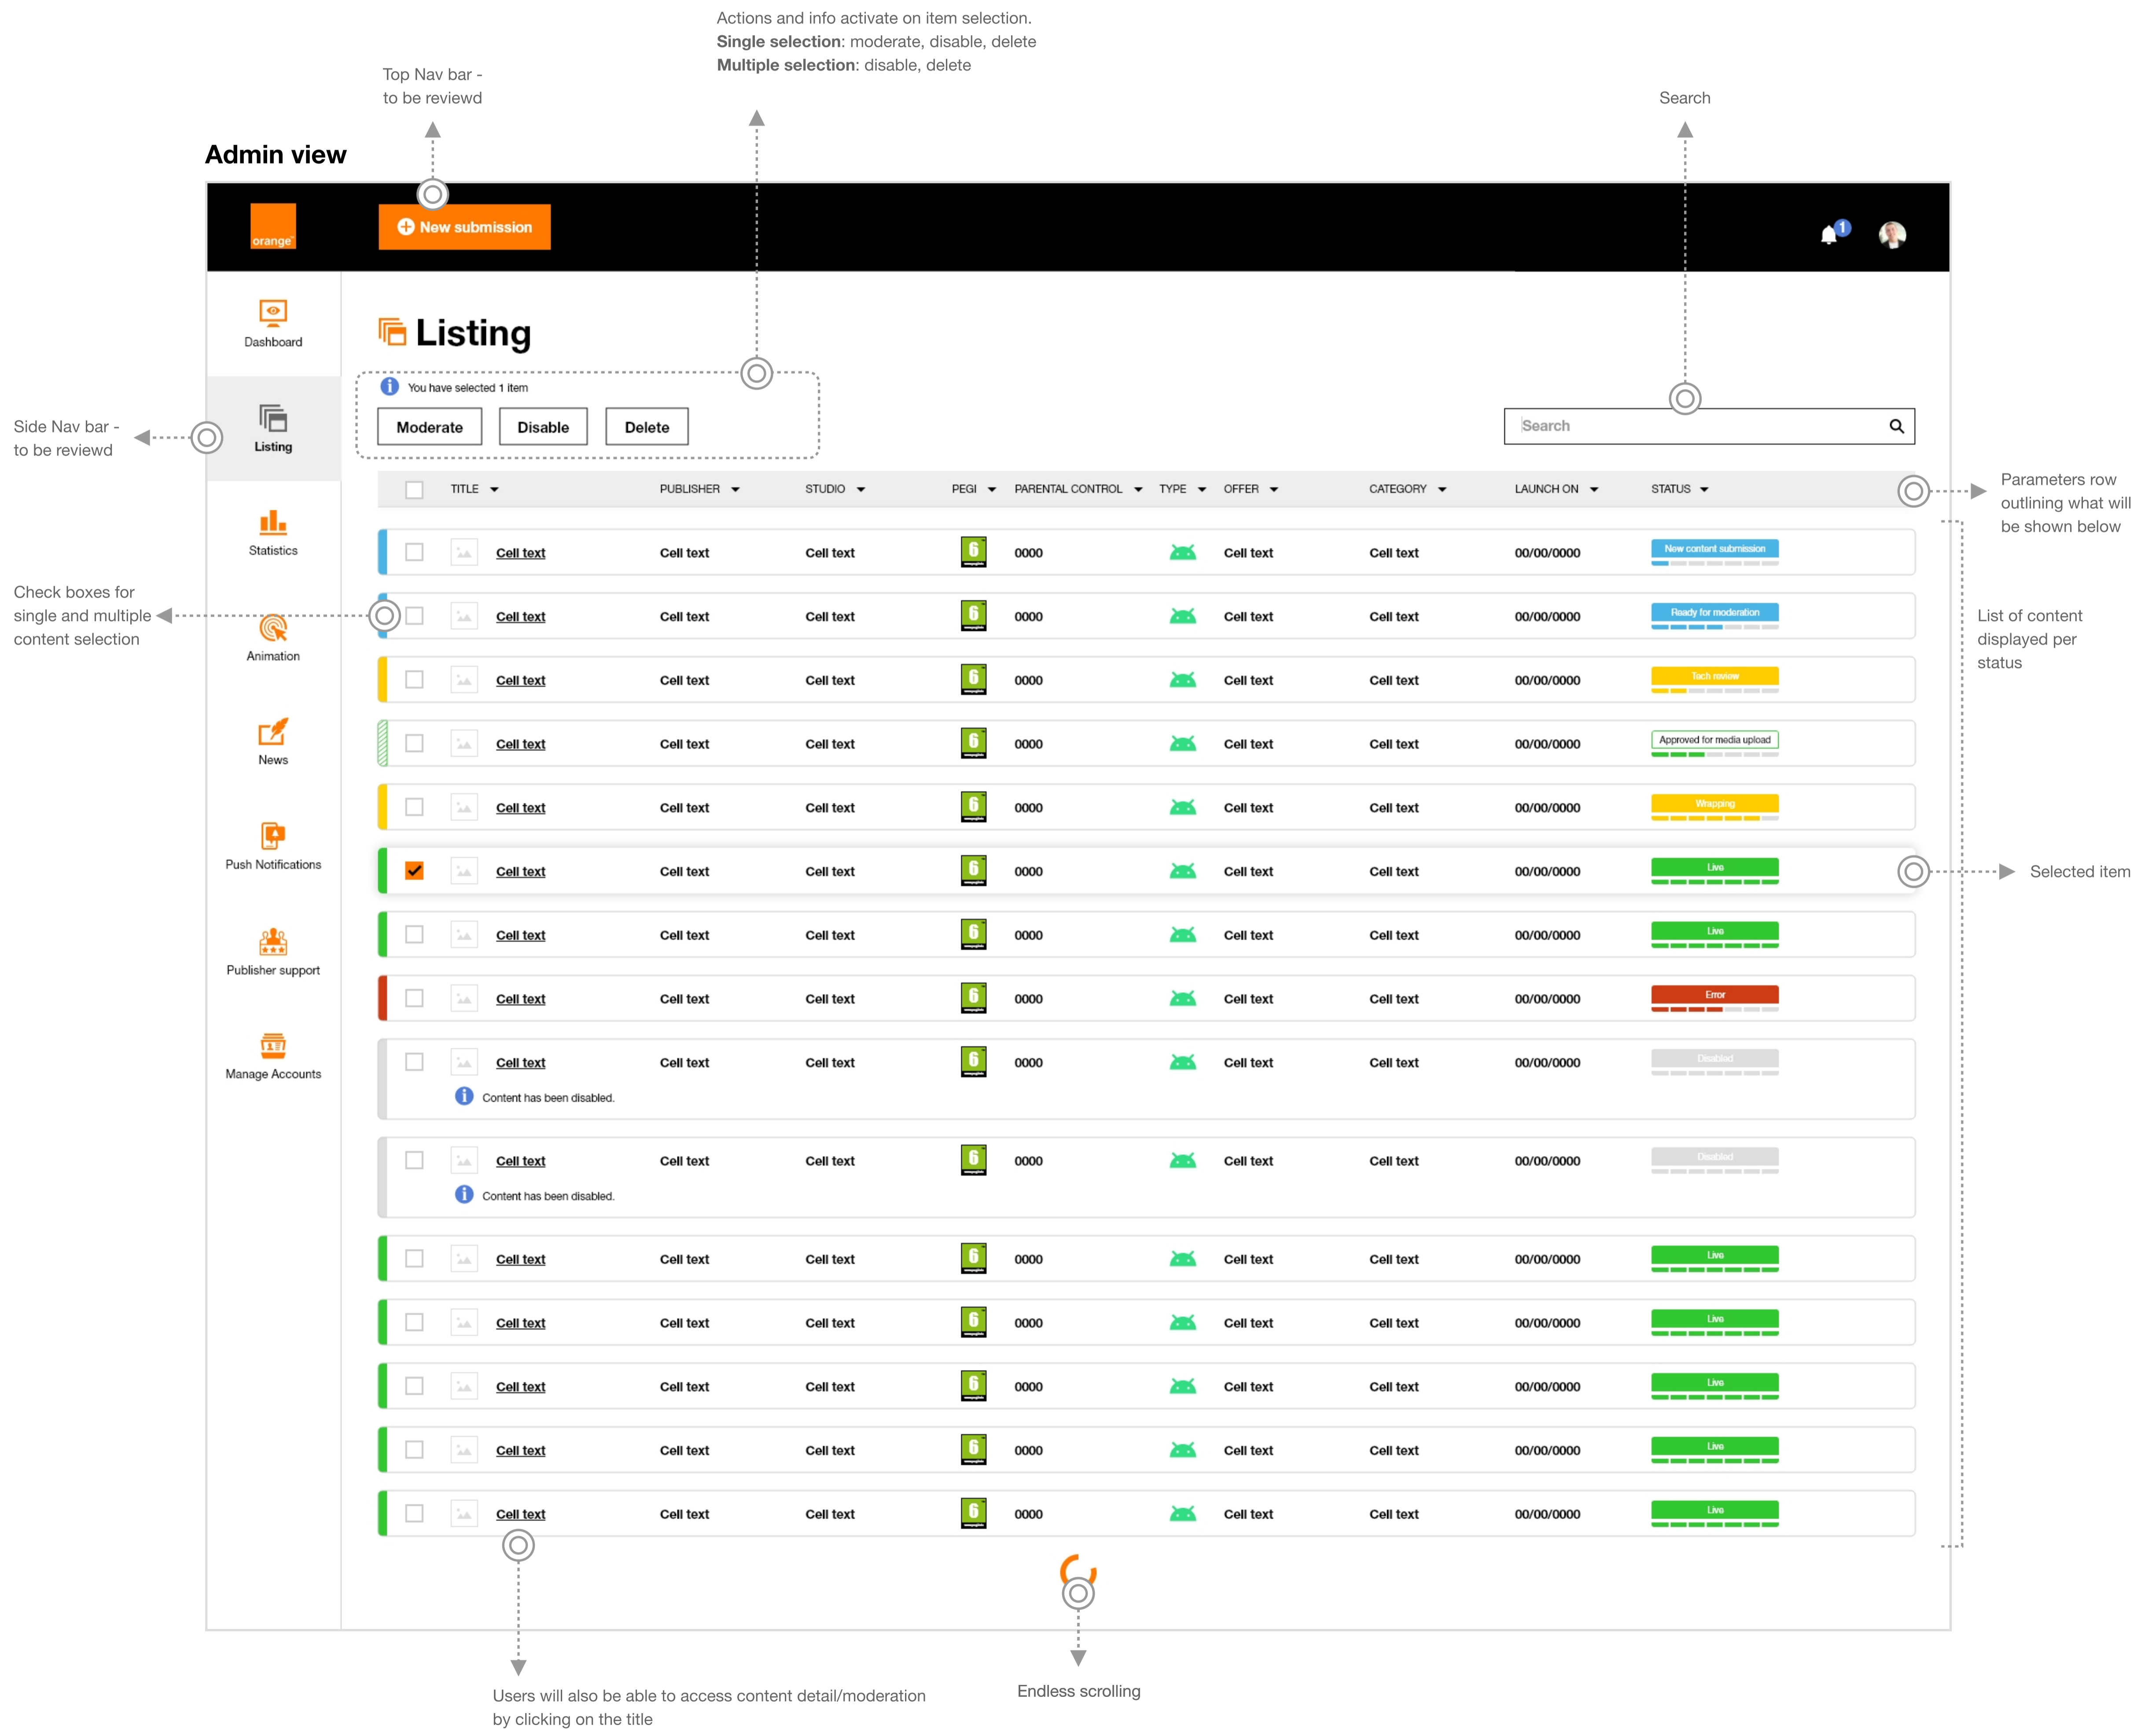

Admin	Provider
 <p>New content submission</p> <p>Admin user knows he/she can perform the editorial review on the file.</p>	 <p>New content submission</p> <p>On stand by until all clear to proceed to media upload.</p>
 <p>Tech review</p> <p>Tech review is performed by the system.</p>	 <p>Content validation</p> <p>On stand by until all clear to proceed to media upload.</p>
 <p>Approved for media upload</p> <p>Status communicating that both editorial and tech reviews were successful. Admin on stand by until provider completes media upload step.</p>	 <p>Ready for media upload</p> <p>Provider can move onto the second step of the submission and upload all media and information related to the content.</p>
 <p>Ready for moderation</p> <p>Admin user knows he/she can perform the editorial review on media and info.</p>	 <p>Media submission</p> <p>On stand by awaiting final validation: moderation, wrapping (apk only), QA.</p>
 <p>Wrapping</p> <p>Content being wrapped, (apks play).</p>	 <p>Final validation</p> <p>On stand by awaiting final validation: moderation, wrapping (apk only), QA.</p>
 <p>Quality assurance</p> <p>Quality assurance on content.</p>	
 <p>Live</p> <p>If all editorial and tech validations are successful the content goes live</p>	 <p>Live</p> <p>If all editorial and tech validations are successful the content goes live.</p>
 <p>Disabled</p> <p>Admins have the possibility to turn on/off content. When this action is performed the user must set a time frame and leave a mandatory comment to justify the reason.</p>	 <p>Disabled</p> <p>The provider will see the disabled content status and comment left to justify the action.</p>
 <p>Error</p> <p>Errors can occur at any stage of the ingestion process. The error type will either be displayed inside the status or as a comment inside the item.</p>	 <p>Error</p> <p>Errors can occur at any stage of the ingestion process. The error type will either be displayed inside the status or as a comment inside the item.</p>

4. Updated status

 14/03/2022 → 11/04/2022

5. Error state

 14/03/202 → 11/04/202

 Error notification text goes here.

Filtering

Admin view only. Filtering UI will be the same for both views with different parameters)

The image illustrates the filtering UI in four stages:

- Inactive:** A horizontal bar with a search icon and dropdown menus for TITLE, PUBLISHER, STUDIO, PEGI, PARENTAL CONTROL, TYPE, OFFER, CATEGORY, LAUNCH ON, and STATUS. A line points to the right end of the bar labeled "Inactive".
- Hover:** The same bar, but the STATUS dropdown arrow is highlighted in orange. A line points to the right end labeled "Hover".
- Opened:** The STATUS dropdown menu is open, showing a list of status options: All, Approved for media upload, Disabled, Error, Live, New content submission, Quality assurance, Ready for moderation, Tech review, and Wrapping. A line points to the right end labeled "Opened".
- Updated view:** The STATUS dropdown is closed, and a small '2' is displayed next to the STATUS label. A line points to the right end labeled "Updated view".

Alerts

Used to give users feedback and guide them with tips
